NOT JUST FOR KIDS

Did you buy a 3D pen for your child last Christmas? Thousands did, because, particularly from a parent's point of view, they are the ideal present: not only do kids love them (the pens keep them quiet for hours), but they're educational as well. The principle is simple: you introduce a colored filament into the pen and switch the pen on.

filament

The filament is heated and, when you press the right button, soft "ink" emerges, which cools and hardens instantly. This means you can "draw" in three dimensions and do all sorts of things: create your own jewelry, paintings or sculptures, decorate a vase, mend a zip or a hole... There are already lots of videos online showing you what these fantastic pens can do. So why not buy one for yourself? They're not just for kids! See our website, www.3dsuperpens.com. Prices from $25.

What does the text tell us about 3D pens?

- Not many people bought them last Christmas.
- Children don't really like them.
- **Kids are happy to play with them for hours.** ✓
- Children love them but their parents don't.

41
